

Counterbalance Forklift License British Columbia

Counterbalance Forklift License British Columbia - When operated by totally trained operators, forklifts can become a major advantage for companies and firms. We can provide your employees a comprehensive training program which consists of all factors of operating a powered lift equipment. Counterbalance forklift training offers forklift operators with the knowledge and practical skills needed to be able to operate forklifts efficiently and safely. The particular program provides a combination of classroom theory, participant observation and hands-on training within a warehouse-type surroundings. Training can be on site and/or customized.

The course goes through the lift truck fundamentals, regulations and rules, components, load centres and factors affecting stability. Procedures about the general operation of the forklift is taught, in addition to circle checks, startup, shutdown, forward/reverse on level ground, and operating around other individuals. Load handling subject matters include load pickup and placement, selection of loads, loading and off-loading trailers and load security and integrity. Participants would learn operational maintenance procedures, like recharging and refueling. Workplace safety issues will be discussed. Individuals participating would learn about the environmental conditions affecting the performance of the lift truck and be able to recognize potential hazards. Advanced training on propane handling could be included.

Both employers and employees can face severe penalties if industry and national guidelines are not followed in the operation of forklifts. Employees who operate a forklift or reach truck ought to be knowledgeable concerning the rules about their safe operation. Training is recommended for any individual applying for a job which requires forklift operation.

We offer in-class theory and hands-on training in personalized, small classes. Training choices comprise refresher or entry level courses.
