

Boom Lift Operator Training British Columbia

Boom Lift Operator Training British Columbia - The cherry picker work platform is a type of work platform, that would typically have a platform or bucket at the end of a hydraulic lifting system. The machine is also called a boom lift, man lift, basket crane or hydraladder.

The platform or bucket is usually mounted on the rear of a large vehicle such as a truck, that is sometimes called a bucket truck. A self-moving platform, stand-alone trailer or flat back pickup van can likewise be used. The worker stands in the bucket and works from there. The person within the bucket normally comprises an upper set of controls allowing control of the bucket's position. The bucket's reach could be extended on various models by telescoping in order to adjust the lifting arm. Safety controls which are automatic prevent tipping. Articulated boom lifts are recommended for working within tight spaces or when it is required to clear obstacles.

Cherry pickers, as the name suggests, were first made for picking fruit at high levels in trees. These machines are usually used in other businesses such as mining, exterior painting and construction. Sometimes they are used for cleaning windows on high building. The machines are used to service telephone, cable television and electrical equipment on utility poles. Occasionally, firefighters use cherry pickers, called snorkels, when ladders are insufficient. During Christmas season, civic workers can be seen in cherry pickers hanging lights and banners.
