

Boom Lift Training British Columbia

Boom Lift Training British Columbia - Elevated work platforms, likewise called aerial platforms, allow workers to carry out jobs at heights which would otherwise be not reachable. There are different styles of lifts designed for different site applications and conditions. If operated carelessly, elevated work platforms can lead to death or serious injury. The most common causes of related accidents are falls, electrocution, tip-overs and crushed body parts. Lift operators must be trained fully in techniques to avoid accidents during the operation of lifts.

Aerial Lift Safety course is designed for people who have to operate the devices more effectively and safely. The program provides thorough instruction on the most utilized lifting devices in the business.. Types of lift covered include scissor, articulating and boom supported aerial lifts. The video presents the correct procedures operators should follow. Instruction focuses on protection against falls, pre-operational inspection, stability of the device and safe driving procedures.

The boom lift training course will help to address employee safety and equipment reliability, utilizing materials which are fully compliant with your local and regional requirements and regulations. Training techniques and course management will be taught. The trainer would likewise become well versed in the technical aspects of aerial lift safety.

Both practical training and classroom training are components of the Aerial Platform/Boom Truck Training program. Both sessions must be successfully finished for the participant to be given a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms can be positioned totally beyond the base of the equipment. The theoretical part of the training is nearly identical for both kinds. The practical component of the training can be finished more quickly if just one type of machine is used.

Elevating Work Platform Training Program Objectives:

For the safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training would help operators utilize their equipment more efficiently and would lessen the possibilities of workplace accidents. Trainees would review of company policies and applicable rules, discuss Due Diligence, review Criminal Negligence and consequences to trainers, employers, employees and supervisors. Participants will review machine features, operating procedures, stability, fueling/charging procedures and parking. Site-specific safety issues will be dealt with.
