

Clark Forklift

Clark Forklift Forklift Training - At this time, there are over 350,000 Clark forklifts performing worldwide, and in excess of 250,000 in use in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, duel fuel, gasoline, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 distinctive designs of forklifts, with parts covering more than 120,000 specialized components for all of its automated equipment. Your regional Clark Seller is your complete source for availability of all your parts requirements provided by Clark Totalift.

Clark's extraordinary Parts Distribution Centers are conveniently situated in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to provide the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Globally, Clark has one of the most impressive supplier support networks. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the materials handling industry.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark has a continual goal to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental limitations, thus placing them in a prevailing industry position.

Lean Manufacturing

Clark has chosen the system of "Lean Manufacturing" at all of its assembly plants because this technique is particularly economical and permits minimal use of resources. Established to guarantee maximum proficiency, this system is designed to discover and acknowledge the most efficient ways for production plant stewardship. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working in concert, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing expenses. The new value engineering agenda combines modern product development and provides superior client support and service within the industry.
